DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Darrell Scott Juneau on 12/01/08.

The application has been amended as follows:

In claim 4, line 7, delete the phrase "incrementing a transmit power level from" has been replaced with --- incrementing a transmit power level of a pilot strength measurement message from ---

In claim 18, line 9, delete the phrase "level after waiting a given time period" has been replaced with --- level of the pilot strength measurement message after waiting a given time period ---

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to teach "waiting, a predetermined time period during, which call recovery is not completed; and transmitting the pilot strength measurement message from the mobile terminal at a second transmit power level determined by the mobile terminal, wherein the second transmit power level is greater, than the first transmit power level", as cited in the claim.

Regarding claim 4, the prior art fails to teach “incrementing a transmit power level of a pilot strength measurement message from the mobile terminal prior to receiving a hand- off direction message and completion of the call recovery”, as cited in the claim.

Regarding claim 8, the prior art fails to teach “after waiting the predetermined time period during which call recovery is not completed, further instructions to transmit the pilot strength measurement message from the mobile terminal at a second transmit power level determined by the mobile terminal, wherein the second transmit power level is greater than the first transmit power level”, as cited in the claim.

Regarding claim 10, the prior art fails to teach “a third set of computer-readable instructions executable by the processor to transmit the pilot strength measurement message from the mobile terminal at the second transmit power level, the second transmit power level being greater than the first transmit power level”, as cited in the claim.

Regarding claim 18, the prior art fails to teach “a power adjuster to increment the first transmit power level to the second transmit power level of the pilot strength measurement message after waiting a given time period during which call recovery, is not completed, the second transmit power level being greater than the first transmit power level”, as cited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
